

KARTHICK RAJA L

BUSINESS INTELLIGENCE ANALYST | DATA & REPORTING

Dubai, UAE | +971 50 256 7444 | karthickrajacareer46@gmail.com
LinkedIn | GitHub | Portfolio

Profile Summary

Business Intelligence Analyst specializing in Power BI data modeling, DAX, and automated reporting that turns raw commercial data into decisions. Brings 1+ year of hands-on experience building Star Schema models, executive dashboards, and ETL workflows for UAE and India-based businesses, delivering pipeline reporting across AED 15M+ in active opportunities and removing 12+ hours of manual reporting each week. Strong across SQL, Power BI Service (Gateway, scheduled refresh, Row-Level Security) and cloud data platforms (Azure, Snowflake). Microsoft-certified Power BI Data Analyst.

Technical Skills

BI & Data Visualization: Power BI (Desktop & Service), DAX, Power Query (M), KPI Dashboards, Executive Reporting, Drill-through, Row-Level Security

Data Modeling: Star Schema, Fact & Dimension Tables, Relationships, Semantic Models, Time Intelligence, DAX Optimization

SQL & Databases: SQL Server, PostgreSQL, MySQL, Complex Joins, CTEs, Window Functions, Query Optimization

Cloud & Data Warehousing: Microsoft Azure, Snowflake, Azure Data Factory, ETL Workflows, Power BI Gateway, Scheduled Refresh

Excel & Automation: Advanced Excel, Pivot Tables, XLOOKUP, INDEX-MATCH, Power Pivot, Reporting Automation

Programming & Tools: Python (Pandas, NumPy), Git, JIRA, Agile

Work Experience

Enjay Engineering | Dubai, UAE (Remote, Contract)

May 2025 – Nov 2025

BI Analyst / Power BI Developer

- Partnered with regional sales managers to define pipeline KPIs (win rate, quotation aging, conversion), turning scattered quotation data into a single source of truth covering AED 15M+ in active opportunities across the UAE emirates.
- Redesigned the manual weekly quotation report into an automated Power Query / ETL workflow, removing 12+ hours of manual effort each week and giving leadership near real-time pipeline visibility.
- Built a Star Schema model and 30+ DAX measures (time intelligence, YoY growth, conversion, quotation aging) so managers could see which opportunities were stalling and act on them.
- Analyzed customer, product, and pricing data to surface demand trends and margin leakage, flagging high-value and at-risk quotations to focus sales follow-up.
- Gathered reporting requirements from regional sales leadership and translated them into KPI definitions, report layouts, and drill-through views used in weekly management reviews.
- Implemented Row-Level Security so each manager saw only their branch, improving reporting governance and adoption across regional teams.

Besant Technologies | Chennai, India

Jan 2026 – Jul 2026

Data Analyst

- Cleaned, validated, and standardized 500K+ transactional records in SQL and staged them into a cloud data warehouse (Azure / Snowflake), creating one reliable source for reporting.
- Automated scheduled refresh through Power BI Gateway, cutting reporting delays by 35% and removing manual update work.
- Built retail dashboards across sales, customer behavior, and fulfillment, using SQL and Python (Pandas) EDA to surface churn indicators and delivery bottlenecks.
- Reviewed existing reporting and data refresh workflows, identifying manual steps and bottlenecks and replacing them with automated processes.
- Defined the data model and KPI logic behind each dashboard, keeping metrics consistent across reports.

Projects

UAE Real Estate Sales & Rental Analytics Dashboard

Tools: *Power BI, SQL, DAX, Power Query, Data Modeling*

- Centralized UAE property sales and rental data into one Power BI dashboard to analyze revenue, rental activity, broker performance, and market trends.
- Modeled an 8,000-property dataset into a Star Schema (properties, brokers, transactions, dates, locations) for emirate-level analysis across all 7 emirates.
- Built a cleaning pipeline in SQL and Power Query, resolving inconsistent emirate names, duplicate listings, and formatting errors.
- Developed DAX measures for revenue, cumulative sales, conversion, and broker contribution, comparing 18 broker teams to highlight top and under-performers.

Steel Quotation Management & Sales Analytics Dashboard

Tools: *Power BI, SQL, DAX, Power Query, Excel*

- Structured and validated quotation data in Power Query, resolving duplicates, missing fields, and date-format issues to build an analysis-ready model.
- Delivered a 5-page dashboard tracking quotation value, win rate, product demand, steel volume, and emirate activity.
- Developed DAX measures and interactive filters so management could analyze quotation trends and compare customer and product performance.
- Made stale and high-value opportunities visible for follow-up, supporting a 15% improvement in sales conversion.

Education

B.E. Computer Science and Engineering *Graduated 2026*

Hindusthan Institute of Technology, Coimbatore

Certifications

- Microsoft Certified: Power BI Data Analyst Associate
- Google Business Intelligence Professional Certificate
- Microsoft Azure Fundamentals (AZ-900)
- Generative AI for Data Analysts — IBM
