Profile summary

Data Analyst in Dubai with direct experience in sales, commercial, retail, and operational data analysis using Advanced Excel, SQL, Power BI, Power Query, and DAX. Experienced in maintaining and analyzing large datasets, building KPI dashboards and recurring reports, validating data, and identifying trends and business opportunities. Worked with 500K+ transactional records and supported analysis of AED 15M+ in commercial opportunities. Automated weekly reporting workflows, saving 12+ hours per week.

Technical Skills

- Business Intelligence & Data Visualization:** Power BI (Desktop and Service), DAX, Power Query (M), KPI Dashboards, Executive Reporting, Data Visualization, Drill-through Reporting
- Databases & SQL:** SQL, SQL Server, PostgreSQL, MySQL, Relational Databases, Complex Joins, CTEs, Subqueries, Window Functions, Aggregate Queries, Database Normalization
- Data Analysis:** Sales Analysis, Retail Analytics, Commercial Analytics, Customer Analysis, Customer Segmentation, KPI Tracking, Trend Analysis, Performance Analysis, Revenue Analysis, Variance Analysis, Data Cleansing, Data Validation, Data Accuracy
- Excel & Automation:** Advanced Excel, Pivot Tables, XLOOKUP, INDEX-MATCH, Power Pivot, Data Validation, Reporting Automation, Reporting Trackers and Templates, Management Reporting
- Data Modeling & ETL:** Data Modeling, Star Schema, Fact & Dimension Tables, ETL Workflows, Data Transformation, Power Query, Power BI Gateway, Scheduled Refresh, Row-Level Security (RLS)
- Programming & Cloud:** Python (Pandas, NumPy), Azure, Git, JIRA

Work Experience

Besant Technologies | Chennai, India Jan 2026 – Jul 2026

Data Analyst Intern

- Analyzed retail sales and transactional data to identify sales trends, customer behavior, product performance, and fulfillment patterns using SQL, Excel, Python, and Power BI.
- Used SQL with CTEs, joins, window functions, and aggregations to clean, validate, and standardize 500K+ transactional records, improving data accuracy and consistency across reports.
- Reviewed reporting and data refresh workflows and configured scheduled automation through Power BI Gateway, reducing reporting delays by 35% and improving reporting turnaround.
- Conducted exploratory data analysis using SQL and Python (Pandas) to identify sales trends, customer churn indicators, and fulfillment bottlenecks, supporting data-driven decision-making.

Enjay Engineering | Dubai, UAE (Remote) May 2025 – Nov 2025

Power BI Developer

- Designed and maintained Power BI dashboards delivering executive and project-level KPI reporting for engineering quotation and commercial pipeline performance, giving regional leadership visibility into AED 15M+ in active opportunities across the UAE emirates.
- Built Star Schema data models and 30+ DAX measures covering time intelligence, YoY growth, conversion rates, and quotation aging to support engineering project performance analysis and reporting and management reviews.
- Automated the weekly quotation reporting workflow using Power Query, eliminating 12+ hours of manual reporting effort per week and improving reporting turnaround.
- Analyzed customer, regional, product, pricing, and quotation data to identify demand trends, margin leakage, high-value opportunities, and follow-up priorities for regional sales performance.
- Implemented Row-Level Security (RLS) to provide role-specific branch-level access for regional sales managers, strengthening data security and reporting governance.

Projects

UAE Real Estate Sales & Rental Analytics Dashboard

Tools: Power BI, SQL, DAX, Power Query, Excel, Data Modeling

Impact: Centralized UAE property sales and rental data into a Power BI dashboard, enabling analysis of revenue, broker performance, and market trends across all 7 emirates.

- Modeled a Star Schema with fact and dimension tables for properties, brokers, transactions, dates, and locations, enabling emirate-level analysis across an 8,000-property dataset
- Cleaned and standardized raw property data using Power Query and SQL, resolving inconsistent emirate names, duplicate listings, and formatting errors before reporting.
- Developed DAX measures for revenue, cumulative sales, sales conversion, rental activity, and broker contribution, enabling performance comparisons across 18 broker teams

Steel Quotation Management & Sales Analytics Dashboard

Tools: Power BI, SQL, DAX, Power Query, Excel

Impact: Reduced weekly sales reporting time by 12 hours and tracked a 15% improvement in sales conversion.

- Structured periodic quotation data covering customers, products, quantities, prices, opportunity status, closing dates, and follow-up activity into a Power BI-ready reporting dataset.
- Applied Power Query to cleanse, transform, validate, and standardize quotation data, resolving duplicates, inconsistent values, missing fields, and date-format issues.
- Built a 5-page Power BI dashboard with KPIs covering quotation value, won and pending opportunities, win rate, customer performance, product demand, steel volume, and activity by UAE emirate.
- Developed DAX measures and interactive filters enabling management to analyze quotation trends, identify high-value opportunities, compare customer and product performance, and prioritize follow-up actions.

Business Performance & Customer Analytics Dashboard

Tools: Power BI, SQL, DAX, Power Query, Excel, Azure

Impact: Analyzed \$2.3M in revenue and \$286K in profit across 9,994 orders, providing insights into customer retention, profitability, and year-to-date performance.

- Used SQL and Power Query to extract, cleanse, transform, validate, and standardize data before developing a Star Schema reporting model.
- Developed 20+ DAX measures covering revenue growth, profit margin, average order value, customer retention, and YTD performance to support KPI-driven analysis.
- Built interactive Power BI reports with drill-down analysis across customer, product, and regional dimensions, identifying trends and areas requiring management attention.

Education

Bachelor of Engineering (B.E.) in Computer Science and Engineering
Hindusthan Institute of Technology, Coimbatore

2022 - 2026

Certifications

- Microsoft Power BI Data Analyst
- Google Business Intelligence
- Microsoft Azure Fundamentals (AZ-900)
- Generative AI for Data Analysts – IBM
